(54) ANTI-SKID SIGN BODY

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an anti-skid sign body capable of simultaneously providing both safety measures for such as a slip accident involving human and information.

SOLUTION: This is an anti-skid sign body 1 composed of a base material part 10 including an information sign area 11 provided by printing and a laminated body part 20 having transparency capable of seeing through the information sign area 11. In such case, specially the laminated body part 20 is composed of a base material 22 formed into a sheet shape by a transparent synthetic resin and transparent glass beads 23 fixed on the top of the base material 22 by a transparent adhesive.

LEGAL STATUS

[Date of request for examination] 06.07.2000

[Date of sending the examiner's decision of rejection] 15.07.2003

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
